

WORK EXPERIENCE

FULLSTACK ENGINEER

MAGMALABS FEB 2022 - PRESENT

- I performed **automated web scraping** to get job vacancies from bamboohr.com and show them in the careers section
- I **collaborated closely** with the design department to **plan and enhance UX/UI** in diverse projects, facilitating platform development.
- I developed a **quantifiable KPI system** using **React** within a **Ruby on Rails application**, sharing results through dashboards and tables within national distributors
- I **designed, developed, and integrated** a feature with the existing KPI system that quantifies and visualizes yearly results this helped to gain an incentive-based annual certification in the client company using **Ruby on Rails** and **React**
- I implemented a keyword search functionality in a **Software-as-a-service platform** using **Stimulus**, streamlining search within **AI-integrated chatbots**.
- I introduced the capability to **create custom AI bots** with administrator-defined personalities through directives integrated with the **OpenAI API**, enabling custom bots within the platform.
