💼 WORK EXPERIENCE

MAGMALABS FEB 2022 - CURRENT

SOFTWARE ENGINEER

- I performed automated web scraping to job vacancies from the Bamboo company site, to automize this process on the jobs section on the official website.
- I collaborated closely with the design department to enhance UX/UI in internal projects, thereby facilitating platforms development.
- I developed a quantifiable KPI system using React within a Rails application, visually sharing results with distributors nationwide.
- I integrated an annual certification feature into a Rails app to quantify and visualize yearly results for distributors within the country, granting incentives based on client-defined conditions.
- I implemented a keyword search functionality in a SaaS using Stimulus, streamlining search within AI-integrated chatbots.
- Within an internal SaaS, I introduced the capability to create personalized AI bots with administrator-defined personalities through directives integrated with the OpenAI API, enabling tailored bots within the platform.

BRIGHTCODERS MENTOR FEB 2022 - CURRENT

MENTOR

I've Been Distinguished As a Mentor With The Responsabilite To Share Best Practices Of Coding And Support In The Development Of BrightCoders Participants in the Ruby On Rails Program.

- Evidence 1, Evicence 2
